Summary

I am a motivated software engineering student with a strong foundation in web and software development, seeking an internship to gain practical experience with an industrial project team. Enthusiastic about understanding industry workflows and contributing to real-world projects. I am passionate about learning through fixing bugs and solving complex problems. Committed to continuous improvement and ready to effectively contribute to a dynamic and innovative team environment.

Education

Sri Lanka Institute of Information Technology (SLIIT)

BSc (Hons) in Information Technology Specialized in Software Engineering — CGPA: 3.46

Malabe, Sri Lanka

July 2022 – Present

Technical Skills

Backend: Java, Node.js, PHP, Flask, Python, NestJS

Frontend: React, JavaScript, Angular, Next.js, Typescript

Databases: MySQL, MongoDB, Firebase

Mobile: Kotlin, React Native

Frameworks and Libraries: MERN Stack, React + Vite, Tailwind CSS, Jest, Redux

Tools and Software: Eclipse, Android Studio, Visual Studio, VS Code, Figma, Trello, Office 365, Docker, Jest

Design and Methodologies: UML Design, Database Design, Agile, UI/UX Design, Git, Jira, XML

Hosting & DevOps: Railway, Docker, Microservices Architecture, MVC Architecture

Languages and Soft Skills

Critical Thinking

Teamwork

Time Management

Communication Skills

Project Management

English: Intermediate

Sinhala: Native

Personal Projects

Personal Finance Tracker System

Technologies: MongoDB, Express.js, React, Node.js, MUI, Jest

Features: Developed a secure financial management system with role-based authentication (Admin & User) using JWT. Features include expense tracking, budgeting, financial reports, multi-currency support, and goal tracking with real-time insights.

Transportation System

Technologies: MongoDB, Express.js, React, Node.js, MUI

Features: Developed "GoRoute" using the MERN stack for public transport reservations. Managed version control with Git and ensured high security and performance standards throughout the development process.

API Rest Countries

Technologies: React, MUI, Jest, Rest API, Railway

Features: The REST Countries API to display and search country details, tested with Jest, deployed on Railway.

LMS

Technologies: Flask, Tailwind CSS, React, MySQL

Features: Developed a Learning Management System using React, Flask (backend), MySQL (database), and Tailwind CSS. It includes roles for students to access courses and track progress, and admins to manage courses and monitor activities

ERP-System

Technologies: PHP, MySQL, HTML, CSS

Features: An ERP System built with PHP, HTML, CSS, and MySQL focuses on creating a platform for efficient organizational resources. The CRUD functionality provides essential operations to manage various data entities like items, inventory.

To Do App

Technologies: Kotlin, MVVM Architecture, Room Database, Kotlin Coroutines, Live Data

Features: Developed a task management CRUD app

Group Projects

QuickBite

Technologies: Next.js, NestJS, TypeScript, Docker, Redux, MongoDB, Microservices, Tailwind CSS

Features: QuickBite is an online food delivery platform that connects customers with local restaurants. It allows users to browse menus, place orders, and track deliveries in real time.

Insight Eye

Technologies: Firebase, React Native, Google API

Features: A React Native learning platform for visually impaired students uses voice commands for math lessons, powered by Google API and Firebase for real-time progress tracking.

360 Care

Technologies: Firebase, React Native, Google API

Features: Developed a personalized health app with smart diet plans, sleep tracking, and doctor recommendations for wellbeing.

Medi Care

Technologies: MongoDB, Express.js, React, Node.js, Tailwind CSS

Features: Built a MERN-based appointment system with booking management and provider scheduling, styled with Tailwind CSS.

Dairy Farm Management System

Technologies: MongoDB, Express.js, React, Node.js, MUI

Features: Built a MERN stack system for managing employee attendance with QR codes, details, leave requests, and generating reports.

Online Shopping Store

Technologies: Java, HTML, CSS, Bootstrap, MVC

Features: Developed a Java-based online store for baby products, featuring a range of items like diapers, clothing, toys, and accessories for infants and toddlers.
